

## **Deposition Review Policy**

The Trust requires that all depositions (full depositions as well as deposition excerpts) include a cover page that identifies the deponent, his or her relationship to the Injured Party, and all relevant portions of the deposition by line and page number.

For purposes of this policy, relevant portions shall include:

1. Identification of the Debtor's products
2. Job sites where product contact occurred
3. Dates and duration of product contact
4. Descriptions of the nature of the Injured Party's product contact

The filer will be responsible for ensuring that all relevant portions are identified, including those that may be contradictory to other portions of the same deposition.

Depositions that do not contain a cover page with the information set forth above will not be reviewed and will be issued a deficiency. For claims that have already been submitted, the cover page may be appended as a new document.
